

# Metallica

MONOPRESSOCOTTURA

La linea Metallica in monopressocottura ha come caratteristica la finitura metallizzata della superficie che, unitamente al movimento dato dalle diverse tonalità, permette la realizzazione di campiture in mosaico con particolari effetti di luce e riflessione negli arredi d'interni così come nei rivestimenti di facciate esterne.

The Metallica line in single-press firing has the characteristic metal finish that, with its different shades, allows the realisation of mosaic projects with distinguished light and reflection effects suitable for design of interiors and for covering of exterior facades.

La série metallica en monocuisson sous pression, propose une finition de surface métallique associée avec une combinaison de différentes tonalités de couleurs et de formats. Cette association permet de réaliser des mosaïques avec une profondeur et des effets de lumière, aussi bien en intérieur qu'en extérieur.

Die Linie Metallica in Einbrandpressverfahren zeichnet sich durch die metallische Glasur-Vollendung aus, die, gemeinsam mit der lebhaften Oberfläche, durch die verschiedenen Metall-Schattierungen, ästhetische Verkleidungs-Verarbeitungen in innen wie in außen Bereich, mit besonderen Spiegelung Effekte, ermöglicht.

La linea Metallica en monococción por prensado presenta un acabado metálico de la superficie que, junto al movimiento ofrecido de las diferentes tonalidades, permite de realizar con el mosaico particulares efectos de luz y reflexión al interior así como al exterior, en los revestimientos de fachadas.

Отличительной особенностью серии керамических плиток одноразового обжига под прессом "Металлика" является металлизированная отделка поверхности, что вместе с вариациями цветового тона позволяет выкладывать мозаичные поверхности с особым световым эффектом и отблеском, как для отделки интерьеров, так и для облицовки внешних фасадов.

一次压制烧成的 Metallica 系列的特点是表面具有金属处理效果，连同不同色调产生的动感，令铺设马赛克的表面具有特殊的光泽，并对室内家具以及室外正面的面砖产生反光效果。
